'Phone : Epping 2226

Nothing is so satisfying in your garden as a collection of roses blooming as they do from late September until June almost continuously. If you are in doubt as to your selection of varieties I will be pleased to make an all colour selection for you. All I want is your address, so as I may allow for climatic conditions in your district.

Have you a friend interested in orchards or gardening? If so, I will be pleased to post him or her a catalogue free on application.

FOREWORD

In issuing my catalogue for 1942, I again wish to thank my patrons for their whole hearted support during last season. As previously stated, my business is built on over 25 years' experience of fruitgrowing and propagation of all subjects listed in my catalogue. Always in search for something newer and better has been my object, and in the lists you will find enumerated new varieties in citrus, stone fruits, and roses. Just write or 'phone for any information you require.

Packing is free, combined with careful handling. If, on receipt of your parcel, you are NOT prepared to plant immediately, unpack parcel, and keep roots well moistened and covered. Do not stand plants in water, as it is injurious to the finer sections of the root system.

Customers are respectfully requested to remit cash with order. Please make money orders and postal notes payable at Carlingford Post Office. Freight is extra.

RESERVE ORDERS

It is to your advantage to order early. If you have a definite planting plan, and will be unable to plant until late in the season, send your order with deposit, and I will be pleased to hold plants until you are ready to take delivery.

CONDITIONS OF SALE.

Plants are grown, and are checked with the utmost care, and no orders leave the nursery without my personal inspection, and I believe that all goods supplied by me are true to label at time of sale. I will refund money for goods that are wrongly named, but give no further warranty, expressed or implied, as to their length of life or productivity, and make all sales subject to these conditions.

If purchaser does not accept goods sold on these conditions they must at once be returned to me.

F. D. CATT,

Church St., Carlingford, N.S.W

ROSES

- H.P.—Hybrid Perpetual. Semi climbing habit, generally spring bloomers only. Hardy type.
- H.T.—Hybrid Tea. Ever-blooming and hardy. Bloom from September to June.
- T.—Tea scented. Almost evergreen, and will produce blooms in winter months. Prune lightly.
- Per.—Pernetiana. As a class has become unjustly condemned in coastal areas, but many of the varieties do really well in these districts.
- Polyantha.—Mostly of a lower growth, and suitable for massing or borders.

1/3 each; 14/- per dozen. Freight is extra.

- AMBASSADOR (H.T.)**—A pink sport of Talisman heavily flushed with orange. True bloomer.
- BETTY UPRICHARD (H.T.)**—Colour is salmon and orange. Vigorous and free blooming.
- BRIARCLIFF (H.T.)**—A clear silvery pink sport of Columbia, of perfect form and heavily perfumed.
- CALEDONIA (H.T.)**—Pure white, and perfectly formed. Sometimes balls in heavy weather.
- CATHERINE KORDES (H.T.)**—The colour varies from rich scarlet to bright red. A first-class variety for exhibitors.
- CHAPLIN'S TRIUMPH (H.T.)**—Blooms of excellent shape, and colour is dark red. Strong perfume. Almost thornless.
- CONTRAST (H.T.)**—Inside of petals is bronze pink, and the outside old gold. Blooms long and pointed, and well formed. Tall and upright.
- COLUMBIA (H.T.)**—Deep pink in colour, produced freely on strong bushes. A hard worker.
- COMTESSE VANDAL (H.T.)**—Two toned pink might best describe this variety. Although not vigorous, this rose blooms very freely. A popular sort.
- CRIMSON GLORY (H.T.)**—Probably the best red rose in commerce. Colour is dark velvety crimson, and blooms of perfect form. A decided fault in this variety is weak foliage, which may be overcome by spraying with Lime-Sulphur when pruned in Winter, and by dusting freely with Flowers of Sulphur in the growing seasons. Sweetly perfumed.
- CONDESA DE SASTAGO (H.T.)**—A pretty combination of coppery red, orange, and yellow, and a type that stands out in garden varieties.
- DAME EDITH HELEN (Per.)**—Clear rose pink in colour, and of perfect form. This is the best of all for exhibition. Plants die back badly, and one rarely sees a good bush. Strong perfume.
- ECLIPSE (H.T.)**—Long pointed buds of golden yellow, and freely produced. Habit is vigorous. A really good rose.
- ELITE (H.T.)**—Colour is deep orange pink, with a decided yellow base in open blooms. Tall growing and free flowering. A splendid sort with a lovely perfume.

ETERNAL YOUTH (H.T.)—Colour is soft pink, which lasts through all phases, right up till the petals fall. Plenty of petals and plenty of perfume. Blooms when cut last a long time. A very beautiful variety. Price 2/- each.

E. G. HILL (H.T.)—Flowers are very full and bright red in colour, and last longer than most varieties when cut. The foliage is rather weak, and plants should be treated liberally with wood ashes throughout the growing season.

ETOILE DE HOLLANDE (H.T.)—The most popular of all red roses. Colour is dark red to crimson. Plants upright in habit, with a hardy foliage, and plenty of blooms. An ideal garden type.

EDITOR McFARLAND (H.T.)—Colour is deep pink and growth vigorous. Habit is spreading, and this rose makes a strong and free bearing bush.

EDITH NELLIE PERKINS (H.T.)—A pretty two toned pink with orange shadings. Strong and free blooming.

ELIZABETH OF YORK (H.T.)—Very rich pink, with outside petals of a paler shade. Vigorous and free blooming.

EVERT VAN DYK (H.T.)—Blooms full, and colour is clear rich pink. A hardy and free blooming rose.

FAIENCE (H.T.)—An unusual and novel colour of coppery pink, coppery red and orange. Blooms are large and pointed, while habit is fairly strong.

FASCINATION (H.T.)—An extremely vigorous variety, with blooms of a decorative type, carrying from 20 to 25 petals. Colour is deep pink, with paler shadings on outer petals. Excellent garden type.

FEU PERNET DUCHER (H.T.)—Carries large blooms of sulphur yellow, of a high exhibition standard. Growth is fairly tall and strong, with weak foliage. Use lime sulphur and wood ashes.

FRAU KARL DRUSCHI (H.T.)—Blooms are pure white large and good shape, very freely produced. Does well in any soil. Strong grower.

GAIETY (H.T.)—A very strong grower, giving lots of bloom. A mixture of colours, being copper and orange on a pink base. Ideal garden type.

GEORGES CHESNEL (Per.)—Although only moderate in growth in coastal areas, this variety gives a lot of bloom, and is one of the best we have in yellow roses. Colour is deepest orange, fading to yellow and old gold.

GENERAL MACARTHUR (H.T.)—An old favourite, and an ideal garden type. Colour is bright red, and growth is vigorous. Sweetly perfumed.

GIPSY LASS (H.T.)—A dark red rose, with a lovely perfume. Growth is upright and vigorous.

GOLDEN DAWN (H.T.)—A good rose for exhibition or garden purposes. Colour of sunflower yellow with plants of medium height. Free flowering with a sweet perfume that is not noticed in most yellow roses.

GOLDEN OPHELIA (H.T.)—Blooms are medium size, and cadmium yellow in colour. Plants are strong in growth and extremely free flowering.

- GOLDEN TALISMAN (H.T.)**—Sport of Talisman, similar in all respects but colour, which is a deep yellow, with the edges of the petals touched with red.
- GRENOBLE (H.T.)**—Extra vigorous and hardy. Medium red blooms produced freely. A great garden rose.
- HADLEY (H.T.)**—A dark red rose that behaves best in warm weather. This variety takes mildew badly in Autumn. Wood ashes again.
- HOOSIER BEAUTY (H.T.)**—Deep crimson, blooms of fair size, good shape and full. Sweetly scented.
- J. C. THORNTON (H.T.)**—A tall and hardy type that gives results. Very free and disease resistant. Colour is dark red and holds well.
- J. J. L. MOCK (H.T.)**—An old favourite in pinks. Deep pink with paler outside petals. Should be pruned rather heavily, as the plants are likely to get up in the air after two or three years.
- JOYOUS CAVALIER (H.T.)**—An extremely vigorous bush, producing an abundance of flowers. Colour is an attractive bright scarlet, which never varies.
- JULIEN POTIN (Per.)**—A moderate grower, which is a great pity, as this variety is probably the most beautiful of all our yellow roses. Colour is clear golden yellow, with blooms of perfect form. I have seen occasional plants doing very well in coastal areas.
- KOROVO (H.T.)**—Carries perfectly shaped blooms of clear salmon pink, with an orange base that is clearly seen in open blooms. One of our best pink roses.
- LAURENT CARLE (H.T.)**—Plants have a spreading habit, and bloom freely. Colour is bright carmine red, with a very rich perfume.
- LEONTINE CONTENOT (H.T.)**—Colour is clear sunflower yellow. Blooms are large and of perfect form, while plants are vigorous and healthy.
- LI. BURES (H.T.)**—This rose has a mixture of red, pink, and yellow, and is a very pretty variety. Grows to a large bush, with hardy and glossy foliage.
- LLEIDA (H.T.)**—An extremely beautiful decorative rose, with a combination of red, old gold, and orange, and heavily veined petals. A good grower and free bloomer, but somewhat susceptible to black spot.
- LORRAINE LEE (H.T.)**—One of the latest bloomers we have, with highly resistant foliage, which makes the plant almost evergreen, and very vigorous. Colour is deep rich pink.
- LUBRA (H.T.)**—Blooms are of medium size, rich dark crimson in colour, and of perfect form. Good upright growth, with a nice perfume.
- LADY HELEN MAGLONA (H.T.)**—A dark crimson rose with a strong perfume. Grows well and blooms profusely. The only fault is a weak neck.
- LADY HILLINGDON (T.)**—One of our old tea roses. Makes a big bush if pruned lightly. Colour is rich clear yellow, and blooms are inclined to have a weak neck. Blooms right into Winter.
- MABEL TURNER (H.T.)**—A very vigorous variety. Blooms are large and salmon pink in colour. An ideal garden type.

- MALAR ROS (H.T.)**—A large well formed rose of high exhibition quality. Tall and vigorous, of a blood red colour. Sweetly scented.
- MARY HART (H.T.)**—A red sport of Talisman, with a pronounced orange suffusion, this rose has all the characteristics of the parent with regard to freedom of bloom and perfume.
- MATADOR (H.T.)**—A deep red rose of good form. Plants are healthy and vigorous, with an ideal hardy foliage. Sweetly perfumed.
- MAX KRAUSE (Per.)**—Large and full blooms of good form. Colour orange to yellow, with colour much enhanced in Autumn.
- McGREDY'S PEACH (H.T.)**—Plants are tall and vigorous. Buds are long and pointed opening to semi-double blooms of pink tinted yellow. A good decorative.
- McGREDY'S SCARLET**—A very strong and upright grower. Colour is bright red without variation. A splendid garden sort.
- McGREDY'S TRIUMPH (Per.)**—Although only a moderate grower in coastal areas, this variety does exceptionally well inland. With about 20 large petals, vivid orange red in colour, it is an ideal decorative.
- McGREDY'S YELLOW (Per.)**—Rather a poor grower, and liable to die back on the coast, this rose will find favour wherever it can be grown. Colour is a deep lemon yellow. A lovely rose.
- MERVROU G. A. VAN ROSSEM (Per.)**—One of the very best in this class. Colour is a mixture of orange and vermillion on a yellow ground. Moderate growth.
- MOTHER'S DAY (H.T.)**—Growth is tall and strong and colour white with the faintest tinge of pink. Good for both exhibition and garden.
- MADAME ABEL CHATENAY (H.T.)**—An old favourite. The growth is vigorous and branching, making it a very free bloomer. Colour is clear salmon pink with blooms of moderate size.
- MADAME BUTTERFLY (H.T.)**—Inner petals of salmon pink, with paler outer edgings. A splendid grower, extremely hardy, and with good foliage. Sweet perfume.
- MADAME COCHET COCHET (H.T.)**—Although a decorative type, the blooms are of perfect form. Habit is fairly strong, and blooms are produced freely. Colour is a pretty coppery pink.
- MADAME LOUIS LENS (H.T.)**—A very vigorous and free blooming type. Colour is pure white, with shapely blooms of medium size. Full and lasting.
- MADAME NICHOLAS AUSSEL (Per.)**—Vivid orange carmine will probably be the plainest way to describe this rose. Growth is moderate, but blooms are freely produced.
- MADAME P. S. DU PONT (H.T.)**—Colour is yellow with orange shadings. Plants are of moderate height with an ideal foliage. A most satisfactory type.
- MADAME SECOND WEBER (H.T.)**—Blooms are a clear salmon pink, and well shaped. Bushes of moderate growth. The climbing sport of this variety is preferred by most people.

- MRS. BRYCE ALLEN (H.T.)**—Deepest carmine pink in colour, is full and shapely, with a wonderful fragrance. Growth is fairly vigorous, and blooms quite a lot.
- MRS. C. J. BELL (H.T.)**—A salmon pink sport of Radiance. Extremely vigorous and free flowering.
- MRS. CHAS. LAMPLOUGH (H.T.)**—Tall and strong in habit and produces exhibition blooms of enormous size and of good form. Exhibitors only.
- MRS. DUNLOP BEST (H.T.)**—A strong and spreading grower, the plants require plenty of room. Colour is apricot and yellow. A very free type.
- MRS. GEORGIA CHOBE (H.T.)**—One of the newer roses that has come to stay. This rose is vigorous and upright and carries perfectly formed blooms of clear pink with a delightful fragrance.
- MRS. H. BROCKLEBANK (H.T.)**—A very vigorous and free blooming rose. Colour is near white, tinted with the palest shade of salmon pink. An ideal garden variety.
- MRS. H. STEVENS (T.)**—A large growing bush, bearing masses of pure white flowers, which have an occasional red marking on the outer petals. Mildews badly in Autumn. Prune lightly.
- MRS. H. R. DARLINGTON (H.T.)**—A first class exhibition rose, carrying up to 70 petals. Colour is pure white, but the blooms sometimes have a greenish tinge. Moderate grower.
- MRS. HENRY WINNETT (H.T.)**—Growth of this variety is strong and upright, and carries blooms of a high exhibition standard. Colour is blood red, with a very sweet perfume.
- MRS. W. E. LENON (H.T.)**—Large and perfectly shaped blooms, and colour varies from deepest pink to carmine red, with a delightful fragrance. Moderate growth.
- NUMA FEY (H.T.)**—A new rose that will find favour everywhere. Carries large blooms of good shape and quite a novel colour in pink. Best described as orange salmon. Plants are very vigorous and free blooming.
- OLIVER MEE (H.T.)**—Bushes are large and branching. Blooms large and well shaped, and pale salmon pink in colour. A first class variety both for exhibition and garden.
- OPHELIA (H.T.)**—A strong grower, and extremely hardy, both in wood and foliage. Large, well formed blooms, pale salmon, with a decided flush of yellow. Good perfume.
- OSWALD SIEPER (H.T.)**—A fairly strong grower with clean foliage. Blooms are large and well formed, and ivory white in colour. Well up to exhibition standard.
- PICTURE (H.T.)**—A dainty medium sized rose of clear pink. Plants are of medium height, and bloom profusely. An ideal bedding type.
- POINSETTIA (H.T.)**—A novelty rose of great promise. Tall and upright in habit, and blooms very freely. Buds are dark red, opening into blooms of a vivid scarlet colour.

- PRESIDENT BOONE (H.T.)**—Extra large blooms of splendid form, suitable for exhibition only, as the flowers have a weak neck. Strong and tall and sweetly perfumed.
- PRESIDENT H. HOOVER (H.T.)**—A very attractive rose, with a mixture of crimson and orange on a yellow base, suitable for both garden and exhibition. Tall grower, and sweetly perfumed.
- PRESIDENT MACIA (H.T.)**—Makes a vigorous and spreading bush. Colour is clear salmon pink, with lighter tonings on outside petals.
- RADIANCE (H.T.)**—Probably the most vigorous and free blooming of all our roses. Blooms are large and have a blunt point. Colour medium pink with a paler edge.
- RADIO (H.T.)**—Quite original in colour, the petals being deep yellow, flecked with scarlet. Is most variable, as some blooms are heavily marked, while others show the flecks very faintly. Strong growth and glossy foliage.
- RED RADIANCE (H.T.)**—A cerise red sport of Radiance, with the same vigour and freedom of blooming.
- RED VAN ROSSEM (Per.)**—An orange red sport of van Rossem, which varies considerably, according to the season.
- REV. F. PAGE ROBERT (Per.)**—Plants of this variety are not strong in habit, which is a great pity as it is a lovely rose. Colour is a mixture of red, salmon, and orange.
- RICHARD E. WEST (H.T.)**—Blooms are clear cadmium in colour, while bushes are strong and spreading.
- ROBYN (H.T.)**—Sport of Talisman, similar in all respects but colour, which has a pretty combination of red, pink, apricot, and yellow, inside of petals red and pink, outside yellow and apricot.
- ROSELANDIA (H.T.)**—A strong and healthy type producing an abundance of flowers. Medium size blooms, deep clear yellow in colour.
- ROME GLORY (H.T.)**—A new cerise red rose of perfect form, and of great value to exhibitors. The plants are tall and strong, but take mildew very badly, and this variety will not find favour as a general garden variety. Spray regularly, and use plenty of wood ashes.
- ROSE D'AMOUR (H.T.)**—A most attractive blending of colours of red and coppery orange on a yellow base. Bushes are moderately high and free blooming.
- ROSE MARIE**—One of the hardest workers we have. Plants rather low and bushy, producing an abundance of blooms. Colour is clear rose pink, with a sweet perfume.
- ROTARY LYON (H.T.)**—Growth is strong and erect, and the flowers are yellow, with pale shadings of vermillion and orange in attractive pastel shades, intensifying in the Autumn flush.
- ROUGE MALLERIN (H.T.)**—Blooms are deep velvety crimson, full, and of good form, and with an extremely sweet perfume. Plants of medium height with a strong foliage. A splendid rose.

- SIGNORA P. PURICELLI** (Per.)—An outstanding rose in this class. Blooms are long and pointed, with a delicious fragrance. Colours are well blended in orange, salmon, and vermillion. Moderate growth.
- SIR HENRY SEGRAVE** (H.T.)—Colour is lemon yellow, and blooms large and shapely, well up to exhibition standard, while the growth is vigorous and branching.
- SHOT SILK** (H.T.)—Colour is an attractive pink, suffused with orange. Plants low and bushy, which bloom freely. An ideal bedder.
- STERLING** (H.T.)—Habit is tall and upright, producing blooms of perfect form, suitable for exhibition. Colour is deepest pink, with a lovely perfume.
- SWEETNESS** (H.T.)—A tall and vigorous grower, and a very free bloomer. Very large blooms of a decorative type. Colour is straw pink, opening to yellow.
- SOUVENIR DE H. A. VERSCHUREN** (H.T.)—A very strong and upright variety, and extremely free. Colour is clear yellow. An excellent garden variety.
- SOUVENIR DE MDME. BOULLET** (H.T.)—Bushes are of medium height, and extremely free flowering. Flowers are of medium size, and deep orange yellow in colour. The climbing sport of this rose gives blooms of a higher quality than the dwarf, and flowers very early.
- SOUVENIR OF STELLA GRAY** (T.)—A very old rose that still keeps its place in the lists. Bushes are of medium height with an ideal foliage, while the colour is mainly yellow with copper and orange shadings.
- TALISMAN** (H.T.)—Plants are fairly tall and upright in habit, and bloom profusely. Colours are a brilliant suffusion of red, orange, copper, and yellow. An ideal type for either massing or cut flowers.
- TEXAS CENTENNIAL** (H.T.)—A so called red sport of President Hoover. Colour is actually a bright orange red in bud form, opening to orange cerise in the full blooms. Large and well formed, with a delicious fragrance.
- THE DOCTOR** (H.T.)—Another novelty of real merit. Plants are strong and spreading, producing long pointed buds that open to huge peony shaped blooms. Colour is delightful shade of clear mid pink with a sweet fragrance.
- UNA WALLACE** (H.T.)—A very tall and hardy type, with disease proof foliage. Buds long and pointed, opening to an attractive deep pink colour with a sweet perfume. Good for both garden and exhibition.
- VILLE DE PARIS**—Tall and upright in habit, with blooms of clear canary yellow. A most attractive colour.
- WALTER BENTLEY**—Bushes of medium height with a spreading habit. Blooms are extra large, and coppery pink in colour. A valuable rose for exhibition.
- WARRAWEE** (H.T.)—An extra strong grower, which blooms most generously. Large, semi-double flowers, clear salmon pink in colour.
- WHITE ENSIGN**—Makes a moderately high bush, spreading in habit, with ideal foliage. Colour is a pure glistening white.
- WILLIAM MOORE**—A vigorous and healthy type carrying large blooms of good form. Colour is deep pink. A good exhibition variety. Sweetly perfumed.

CLIMBING ROSES

1/3 each; 14/- per dozen. Freight extra.

BLACK BOY—A vigorous climber, with good foliage, which blooms earlier than most others. Colour is dark velvety crimson.

CLB. DAILY MAIL SCENTED—A moderately strong variety, carrying a rather weak foliage. Colour is darkest crimson, with a very sweet perfume.

CLB. DAME E. HELEN—An excellent variety for exhibitors, carrying extra large blooms of clear rose pink. Sweetly fragrant, and fairly vigorous.

CLB. ETOILE DE HOLLANDE—The best red climber grown. Fairly strong, with an ideal foliage, blooms freely and colour is dark red to deep crimson. Sweet perfume.

CLB. GENERAL MACARTHUR—Extra vigorous, with hardy foliage. Colour is bright red, richly perfumed.

CLB. LORRAINE LEE—Very vigorous, with a highly resistant foliage. Almost evergreen. Colour is deep rich pink. Free blooming.

CLB. MRS. DUNLOP BEST—This variety makes an excellent show. Strong and free, with blooms of yellow shades with apricot.

CLB. MRS. H. STEVENS—Very strong and free flowering. Blooms are white with occasional vermillion markings on outer petals. Semi-double with no perfume.

CLB. VAN ROSSEM—Should be better known. Fairly strong climber with a glossy foliage. Colours are nicely blended with orange and vermillion on a yellow ground.

CLB. MDME. ABEL CHATENAY—Strong trailing growth with healthy foliage. Colour is clear salmon pink. One of the best.

CLB. MDME. SECOND WEBER—The most popular in salmon pink roses. Vigorous and extremely free, with large and shapely blooms. Should be grown in preference to the dwarf.

CLB. PRESIDENT HOOVER—Produces long canes, and makes a pretty show. Crimson and orange markings on a yellow base. Foliage is liable to black spot.

CLB. ROSE MARIE—Extra vigorous and free blooming. Deep rosy pink in colour, and sweetly perfumed. The best deep pink climber.

CLB. RADIANCE—A popular climbing sport of the well known dwarf. Very free flowering.

CLB. RED RADIANCE—A sport from the dwarf. Very free and hardy, and preferred by some to the pink variety.

CLB. SHOT SILK—A lovely rose in all ways, with its strong growth, healthy foliage, and freedom of bloom. Colour is a striking pink, with a suffusion of orange.

CLB. SOUV. DE MDME. BOULLET—A splendid climber that is often ruined by harsh treatment in pruning. This should be done rather lightly. A strong grower, producing orange yellow blooms on very long stalks.

- CLB. TALISMAN**—Red, orange, copper, and yellow in the make-up of this splendid climber. A strong grower, and extremely free.
- CLB. WHITE MAMAN COCHET**—An old tea rose of great vigour, producing an abundance of blooms. Flowers are white, full, and lasting. Resistant foliage.
- GUINEE**—A new rose that will soon become popular. Extra vigorous and free. Colour is dark velvety crimson, opening to darkest red. Large blooms.
- MISS M. MANIFOLD**—Strong and free blooming both in Spring and Autumn. Dark red opening to scarlet.

POLYANTHES

A class of miniature roses produced in large clusters, and ideal for hedge or border work. This type covers a wide area, both in height of plants and size of blooms, so I will classify them for the benefit of selectors; say, Orleans type, and miscellaneous. The Orleans class are all about equal in height and size of blooms, growing to a height of about 2 feet, while the miscellaneous section is most variable, both in height, and size of individual blooms. Borderer, for instance, grows about 18 inches high, while Kirsten Poulsen, the most vigorous of all, gets up to 4 feet high. The heights in this section are marked H, high; M, medium; and L, low.

ORLEANS CLASS

- CHATILLON**—An extremely free type, producing large trusses of blooms. Colour rosy pink. One of the best in Orleans class.
- ETOILE LUISANTE (M.)**—A very pretty and perfect miniature. Blooms are coral red, fading to a lovely shade of deepest orange pink.
- GLORIA MUNDI**—Deep orange scarlet, blooms very double.
- MISS E. CAVELL**—Dark red with a pronounced white eye.
- PAUL CRAMPEL**—Clear orange pink with yellow eye. About the best in the Orleans class.
- RUFUS**—Bright red in colour. Hardly a heat resistant.
- SPARKLER**—Sparkling crimson in colour, with occasional white markings.
- YVONNE RABIER**—An extra strong grower, with healthy foliage. Colour is pure white produced in large clusters.

POLYANTHES

MISCELLANEOUS.

- ALICE AMOS (H.)**—An extra vigorous variety, with blooms of rose pink, and large clear white eye. Very hardy.
- BETTY PRIOR (H.)**—A tall and vigorous type with blooms of deep carmine pink. Large flowers.
- BORDERER (L.)**—A low growing rose, suitable for borders. Spreading habit, and free flowering. A soft shade of coppery pink. Medium size blooms.

- CECILE BRUNNER (M.)**—A pretty shade of salmon pink, and popular for wedding bouquets, etc. An old favourite.
- ELLEN POULSEN (M.)**—An extra vigorous and branching sort, that blooms freely. Colour is clear pink.
- JACQUES CARROY (M.)**—Blooms very double and produced freely. Colour is deep carmine fading to bright red.
- GEORGE ELGER (M.)**—Makes a shapely bush, and has excellent foliage. Buds of deep yellow, fading to clear yellow in open blooms. The best yellow.
- KAREN POULSEN (M.)**—The most vivid scarlet in this section. Colour is brilliant scarlet, produced in medium size clusters.
- LADY READING**—A red sport from Ellen Poulsen, with all the qualities of the latter. Colour is rich bright red, fading to carmine.
- LADY BRISBANE (H.)**—The best one for hedge work. Ideal foliage, and colour is crimson scarlet. If used as a hedge, prune lightly, and shear off in the same manner as privet.
- MAMAN TURBAT (M.)**—A very free and hardy variety, and ideal as a border. Colour is rose pink.
- MRS. R. M. FINCH (H.)**—A very vigorous and free flowering poly. Colour is pale salmon blooms, being produced in huge clusters.
- ORANGE TRIUMPH (M.)**—The most popular polyanthe in commerce. The colour is not orange, as the name indicates, but bright red in the warmer seasons, deepening to an intense, glistening orange scarlet in Autumn. Individual spikes carry up to 120 blooms.
- SALMON SPRAY (H.)**—An extra tall grower with large blooms of clear salmon pink.
- VAN NES**—A unique type in this class. Colour is deepest pink, and blooms have a crinkled edge. In America this variety is called "Permanent Wave."

FRUIT TREES

APRICOTS

Propagated on Peach Stock.

1/6 each, 15/- per dozen, £5 per 100.

CAMDEN SUPERB—Large yellow, good bearer of quality fruit.

EARLY MOORPARK—A fine flavoured apricot. Ripens early December.

GLENARRY—Good size, ripens middle November, fair bearer.

NEWCASTLE—Yellow red cheek, heavy bearer, good flavour, ripens 20th November.

NECTARINE

Propagated on Clingstone seeding Peach Stock.

Commence bearing 2nd year after planting.

1/6 each, 15/- per dozen, £5 per 100.

BOWERMAN'S SPECIAL—Slip, large, dark red, good bearer, keep well, good market variety. Earlier than Goldmine.

CARDINAL—Very early.

EARLY RIVERS—Ripens early.

GOLDMINE—Large bright red slip, good flavour, bears well, ripens early January.

MASTERPIECE—Large yellow and crimson, late.

NEW BOY—Large dark red, heavy bearer, slip. Ripens 2nd week January.

PEACHES.

Propagated on Clingstone seeding Peach Stock.

Commence bearing 2nd-3rd year after planting.

1/6 each, 15/- per dozen, £5 per 100.

AUNT BECKY—Large, white fleshed, ripens end December, splendid flavour, slip.

BABCOCK—Early, red three weeks before fit to pick.

BLACKBURN—Large yellow slip, red cheek, good bearer, yellow flesh. Ripens 2nd week in January.

BRADDOCK—Red slip, prolific, requires heavy pruning and thinning. Ripens before Xmas.

CARMAN—Large white fleshed slip, cream flushed with red, ripens Xmas, good flavour.

EARLY AUNT BECKY—Ripens before Christmas, good colour.

ELBERTA—Yellow flush, ripens third week in January.

FRANKLIN—Ripens Christmas, white flesh.

GOLDEN QUEEN—Late cling, yellow fleshed to stone, good canner, heavy bearer.

GOVERNOR RAWSON (Franks)—Medium, slip, red, ripens November, good cropper.

J. H. HALE—Large, yellow flesh, partly red, slip, ripens end January. Requires pollinating (Blackburn).

- PHILLIP'S CLING**—Yellow flushed cling, large, good bearer, a canner.
- RENNIE**—Very early, medium, white flesh, fair colour.
- ROWE'S CHAMPION**—White flesh, slip, mid. January.
- SHANGHAI SEEDLING**—Large cling, white flesh, good flavour, heavy bearer, ripens middle January, white red cheek.
- WATTS EARLY**—Best early variety, medium, red, slip, heavy cropper, ripens end November.
- WATTON**—Large, red and cream, slip, white flesh. Good shape for packing, fine flavour, ripens Xmas, heavy bearer.
- WIGGINS**—Large, oblong, white flesh, creamy with red cheek, slip, good bearer, ripens first week January.
- W. H. SPINKS**—Early, good flavour.

PLUMS

1/6 each, 15/- per dozen, £5 per 100.

- BLOOD (Upright)**—Large dark crimson, flesh blood red, heavy bearer, slip, ripens about 25th January.
- BURBANK**—Large red, yellow flesh, early. Bears well.
- NARRABEEN**—Large, skin red and yellow, rich flavour, yellow flesh, bears well, ripens mid January.
- SANTA ROSA**—Large, heavy bearer, crimson, turns purple when ripe, light red flesh, rich flavour, ripens Xmas.
- SHIRO**—Pale yellow, prolific, good all-round plum, ripens 15th January.
- WICKSON**—Large, yellow and red slip, heavy cropper, ripens middle January.
- WILSON**—Medium, yellow flesh, crimson purple, good carrier, heavy bearer if pollinated with Santa Rosa.

FIGS

1/6 each, 15/- per dozen, £5 per 100.

- BLUE PROVINCE**—Purple, strong grower, good bearer, late.

CITRUS FRUITS

PLANTING TIME FOR CITRUS

Citrus Trees may be planted either in Autumn or Spring. For Autumn planting February and March are the two best months, but they can be planted in April, providing the weather is not too cold. August and September is noted as the best time for Spring planting. Although they may be planted at a later date if it is not too hot.

CO-OPERATIVE BUD SELECTION SOCIETY LTD.

Special trees of Late Valencia, Washington Navel and Eureka Lemons, budded from buds secured through the above Society are now available.

For some years it has been recognised that in most orchards there are trees that rarely produce sufficient fruit to be payable whilst other trees are more constant producers of good quality and payable crops, so that with the view to enabling nurserymen to supply trees to planters of the most productive and remunerative standards, the above Society was formed under the aegis of the Department of Agriculture and consists of representative fruitgrowers and nurserymen.

The Society does not and cannot make profits, but merely exists to improve the fruit growing industry by making available for budding selected buds from special trees of the best types of quality fruit and reputed good bearing habits only. Trees from such buds should undoubtedly be more profitable and appeal to all progressive orchardists.

Propagated on Citronelle Lemon Stock.

2/- each, £1 per dozen, £6 per 100.

EUREKA, LISBON LEMONS, LATE VALENCIA AND WASHINGTON NAVELS, from buds supplied by the Bud Selection Society of New South Wales.
